The Tulare County Road Department, in cooperation with the Federal Highway Administration (FHWA), Caltrans Division of Local Assistance/California LTAP Center, and American Civil Constructors, is hosting an open house to demonstrate the constructability of high friction surface treatments (HFSTs) for reducing crashes at intersections.

Pavement friction is critical for ensuring the vehicle remains in its lane. HFSTs should be considered for curves, intersections or ramps with numerous wet weather crashes or with higher known operating speeds.

Join us for a roadside demonstration!

Date: May 11, 2017
Location  Resource Management Agency Headquarters
          Main Conference Room
          5961 South Mooney Boulevard
          Visalia, CA 93277
